

# UNITED STATES ALMOND TRIAL

## YEAR

2018: March - October

## CROP/HYBRID

Almonds/Non-pareil

## LOCATION

Terra Bella, California

## PRODUCTS/RATES

iNvigorate at 2 quarts per acre injected through drip irrigation into soil on March 13 during flower petal fall

B Sure applied at 1 qt/acre on March 1, April 3 and May 7, 2018.

## TRIAL PERFORMED BY

Sawtooth Ag Research

### iNvigorate is a soil-applied liquid microbial

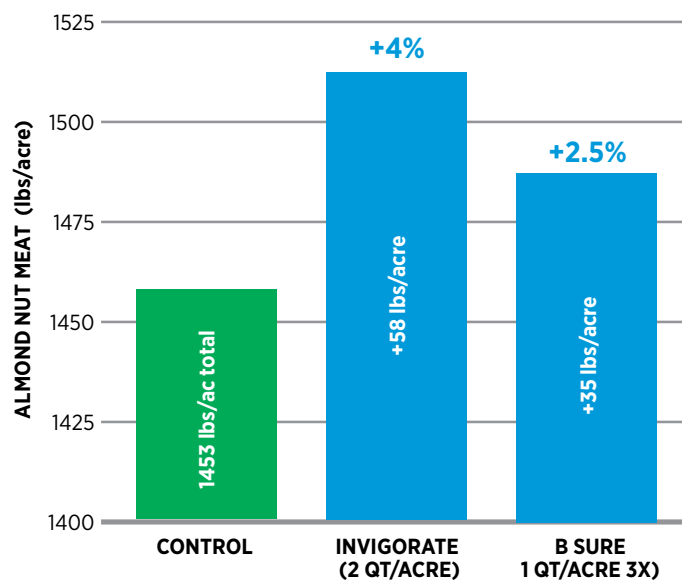

- Frees up nutrients bound to soil particles and crop residue
- Stimulates root growth for enhanced nutrient uptake
- Fosters the growth of a healthy soil microbiome

### B Sure is a liquid foliar biostimulant

- Improves natural plant processes that lead to greater productivity
- Supports plant health and vigor during critical stages
- Stimulates root growth
